

stainless steel skirting board

skirting BA

Stainless steel skirting board, easy to install for an elegant and lasting finish. The profile contoured ends give a snug fit on the wall covering over the bottom perimeter along the dilatation gap joint, thus ensuring the necessary expansion movement to the floor. Illustrated scale dimension 1:1

SKIRTING BA-IL* Stainless Steel AISI 304 - DIN 1.4301

Cold rolled stainless steel profile with protection filmstrip on the surface, to be removed after installation. Available self-adhesive or normal. Stainless Steel AISI 304 ensures high resistance to most diluted chemical agents.

Available also in the brushed/mat version, code BA-IS.
