

technical expansion joint with interchangeable insert

coflex™ CB

COFLEX CB is composed of a twin double metal profile to host the internal rubber seal. This product has been designed to ensure a certain grade of protection to the tile and relative work load it may have to bear. The synthetic rubber insert efficiently compensates and absorbs flooring movements along with the covering material. **COFLEX CB** is suitable to bear distributed weights and tensions. Select a joint with the height matching exactly the tile thickness, the joint must not rise above the level of covering surface but should be laid 0,5 ÷ 1 mm below the edge of the tiles.

Suggested flooring bays 16 – 25 m²

Illustrated scale dimension 1:1

COFLEX CB-AN* Aluminium + Synthetic Insert

The aluminium profile is generally advised for indoor laying jobs and in areas which are less subject to mechanical impact and stress.

Material: Extruded Natural Aluminium

Insert: Resinil + Resinflex

Colours of insert*: Cement Grey, Black

Length: 2,70 metres

COFLEX CB-ON* Brass + Synthetic Insert

Brass offers characteristics of high tolerance to mechanical impact and diluted chemical agents. Suitable for both indoor and outdoor applications conferring a pleasant appearance and a classic finish to the coverings.

Material: Extruded Natural Brass

Insert: Resinil + Resinflex

Colours of insert*: Cement Grey, Black

Length: 2,70 metres

COFLEX CBI 10 P* Spare Synthetic Insert

Made of soft synthetic resin. In case it should look worn out over time just replace the insert with a slight leverage starting from the metal profile ends.

Material: Resinil + Resinflex

Colours of insert*: Cement Grey, Black

Length: 2,70 metres
