

co-ordinating skirting dual-coloured design “Bicolor Design”

wallprotection™ WB

Synthetic resin skirting, through coloured to hide the effects of wear and damage. The smooth surface makes it easy to clean and more hygienic than traditional skirtings.

Available in 16 colours and a range of dual-coloured options, the profile is coved to allow it to be “set-in” to the flooring using a cold weld procedure for a totally homogeneous finish.

Thanks to the particular material composition and to the specific cavity at the bottom, this skirting can also be chemically welded to the PVC floor, as often required by hygiene standards. The WB skirting profile can be co-ordinated with the other profiles in the wall protection range - corner protectors (WA) and bumper guards (WP).

Illustrated scale dimension 1:1,2

100

WALLPROTECTION WB 100 P* Skirting in solid coloured synthetic resin

Synthetic resin skirting co-extruded to offer a dual-colour effect if required.

Resistant to impact damage and most diluted chemicals and detergents.
